

Secure E-Signature

Peninsula Federal Credit Union now offers secure e-signing for consumer loans from any PC or mobile device with capabilities of email and texting.

How does it work?

You will receive a text message letting you know you have electronic documents waiting to sign. This message also contains a pin number. You will then receive your loan documents via email. Once opened, you will be directed to enter the PIN and apply signatures where indicated. Signatures are entered by tapping on the signature box. Once all signatures are collected documents will automatically be sent to the next signer or back to the loan officer for disbursing.
